Experience

MARCH 2018 – JUNE 2018

Linkdood Technologies Sdn. Bhd. – *Intern Programmer*

Developed in-house applications for iOS using Swift. Although I had no experience in iOS development, the need to quickly adapt enhanced my overall ability to develop and work with iOS development. Also learned to use Git for Version Control on all projects. Started off with familiarizing myself with the framework that the company used, and slowly started developing and enhancing existing company products.

JULY 2018 – NOVEMBER 2018

Linkdood Technologies Sdn. Bhd. – *Part-time iOS Programmer*

Continued developing iOS applications for the company. However, was given more substantial tasks, while at the same time making sure timelines were met. Also had the opportunity to work closely with other developers as a team to coordinate tasks in order to meet timelines.
